

ARX-BT3

Bluetooth Compatible Kit

BT3 Capabilities:

Read and transfer data to and from a PC or Android phone

Cruise around via Android phone control

ASURO with BT3

Overview:

The Bluetooth compatible radio set from Global Specialties allows you to install a Bluetooth compatible module on the ASURO or the AAR Arduino robots. With this module you can not only communicate via an infrared link with ASURO or AAR but also via RF waves and Android smartphones.

This wireless Android control will fully drive your robot via a smartphone. Learn all about Bluetooth communication with this Bluetooth compatible kit.
