VWR® SAFETY CABINETS FOR FLAMMABLES AND CORROSIVES

VWR Safety Cabinets are designed to protect both laboratory personnel and the cabinet contents. Fully welded, 18-gauge steel ensures fire protection and strength with reduced gaps. Equipped with upper and lower diametrically opposed side vents, a ground connector on lower right side of the cabinet, double-wall construction with 3.8cm (1½") insulating air space, and an environmentally friendly, electrostatically applied powder coat finish.

All door styles meet OSHA 1910.106, NFPA 30 and NFPA 1.

Self-close door styles also meet IFC requirements and feature a fusible link that melts at 74°C (165°F) for automatic closure in the event of a fire.
