

# VWR® AND VWR SIGNATURE™ ULTRA-MICRO PIPET TIPS, GRADUATED

As per the manufacturer, the below product meets the following criteria:		
VWR Catalog Number	37001-160	
European Article Number	613-2296	
Lot Number	40265-718C4-718I	
Description	VWR TIP PIPET STRL 10UL PK1152	
Date of Manufacture	5/6/2017	
Date of Sterilization	5/12/2017	
Date of Expiration	2020-05	
Country of Origin	Made in USA	

### **Quality System Compliance**

The product conforms to written material specifications and was manufactured under the manufacturer's registered and audited ISO 9001 quality system, and underwent lot testing as outlined in the manufacturer's laboratory procedures. These products come with the highest standard of quality assurance.

### QC Testing

Each lot of item was produced in a tightly controlled environment and subjected to the manufacturer's rigorous testing and performance procedures. The products meet all stated standards for precision, clarity, warp, centrifugation and freedom from contamination.

#### **Product Specifications**

Material:	Pipet Tip Material: Polypropylene	
	Certified free of Bisphenol A (BPA), phthalates and cytotoxic effects. Plastic resins used in product manufacturing have been tested for heavy metals using the prescribed USP method and confirmed to have levels lower than 1 PPM. Resins are USP Class-VI certified, RoHS, FDA regulation CFR 21, and are free of Substances of Very High Concern (SVHC), REACH compliant, and are FDA approved for food contact.	
Non-Pyrogenic Statement:	Product samples are exposed to endotoxin-free water and the resulting extraction fluid is tested for contamination using the kinetic turbidimetric Limulus Amoebocyte Lysate (LAL) assay protocol and USP guidelines. All products tested must display less than 0.05 EU/ml to be certified free of endotoxin.	
ATP Assay:	Product sample surfaces are tested for the presence of Adenosine triphosphate (ATP) using a controlled bioluminescence reaction to detect contamination. Luminescence data is compared to results generated by ATP-free surfaces and surfaces with known amounts of ATP as a positive control. The relative light units' result must indicate less than 2X10 <sup>-12</sup> mg/ul of ATP for the product to be certified as ATP free.	
DNase & RNase Free:	Product samples are exposed to nuclease-free water and the resulting extraction fluid is tested for nuclease activity on commercially available 7.5 kb Poly(A) tailed RNA (1ug) and	

VWR International LLC, Radnor Corporate Center, Building One, Suite 200, 100 Matsonford Road Radnor, PA 19087 VWR International bvba/sprl, Haasrode Research Park Zone 2020, Geldenaaksebaan 464, 3001 Leuven, Belgium http://www.vwr.com

# VWR® AND VWR SIGNATURE™ ULTRA-MICRO PIPET TIPS, GRADUATED

	are visualized on an agarose gel with ap	our 37°C incubation in appropriate buffers. Results propriate positive and negative controls. Extraction n of the nucleic acids by the extraction fluid has RNase-free and DNAse-free.
BSE/TSE Statement:	Hydrogenation of Tallow at 200°C Hydrolysis at 260°C and 48 bar for 1.5 to 2 or	ssed under one of the following sets of conditions:
	and 300 PSIG for 2.5 hours Distilled at 232	
	Directive EC 98/16/EC of March 5th, 199 and further Amendment 419 Annex II of	Jnion standard as listed in the 22nd Commission 8 as annexed to council Directive EC 76/768/EEC 12 June 2001, and as agreed to by the Scientific ons concerning Tallow derivatives for processing utes.
	The manufacturer does not store any proceed any manufacturing areas of their facility or version of their facility or version of their facility or version of the store and the store an	ducts of animal origin, including animal proteins, in warehouses.
DNA Contamination Assay:	Product samples are exposed to DNA-free water and the resulting extraction fluid is tested for the presence of human DNA using primers for known DNA sequences in a PCR reaction. Amplification products are examined by Agarose gel electrophoresis with appropriate positive and negative controls. PCR reactions using extraction fluid must show no PCR-amplified product compared to a positive control containing one picogram of human genomic DNA for the product to be certified as DNA-free.	
Protease Assay:	Product samples are exposed to protease-free water and the resulting extraction fluid is tested for the presence of protease activity by examining test protein degradation in the extraction fluid compared to a negative control and positive control reactions supplemented with 2 nanograms of Proteinase K or Trypsin. Extraction fluid samples must show no test protein degradation relative to the negative control for the product to be certified as protease-free.	
Sterilization Process:	15.2-32.0 kiloGray. This dosage is sufficient Sterility assurance levels are based on the after irradiation.An SAL of 10 <sup>-6</sup> is the higher the ISO 11137 standard and represents a	s processed by e-beam radiation at a dose range of ent to guarantee a sterility assurance level of 10 <sup>-6</sup> the probability of a positive, nonsterile part occurring st level of sterility able to be guaranteed according to 1 in 1,000,000 chance of a nonsterile part occurring s an ISO 11137 validated process, with bioburden ormed quarterly.
	Specified Dosage Range:	15.20 - 32.00 kGy
	Minimum Dosage Delivered:	16.4 kGy
	Maximum Dosage Delivered:	28.6 kGy

## VWR® AND VWR SIGNATURE™ ULTRA-MICRO PIPET TIPS, GRADUATED

Latex Statement:

No Latex was used in the manufacturing of the product. This also includes all the packaging and shipping materials used in the production of all items.

The only time the product or packaging may come in contact with Latex would be from the Latex gloves that production employees are required to wear for the purpose of clean handling and to avoid biological contamination of the products.

**Disclaimer:** VWR states that this declaration will not discharge the user from his obligation to ensure the product is suitable for the intended use.

This Certificate was automatically generated and is valid without a Signature.
