## framework for K-12 science education © 2012

* The Dimension I practices listed below are called out as bold words throughout the activity.

|  | $x$ | Asking questions (for science) and defining problems (for engineering) | $\times$ | Use mathematics and computational thinking |
| :---: | :---: | :---: | :---: | :---: |
|  | $\times$ | Developing and using models | $\times$ | Constructing explanations (for science) and designing solutions (for engineering) |
|  |  | Planning and carrying out investigations | $\times$ | Engaging in argument from evidence |
|  | $\times$ | Analyzing and interpreting data | $\times$ | Obtaining, evaluating, and communicating information |
|  | X | Patterns |  | Energy and matter: <br> Flows, cycles, and conservation |
|  |  | Cause and effect: <br> Mechanism and explanation |  | Structure and function |
|  | $\times$ | Scale, proportion, and quantity |  | Stability and change |
|  | $\times$ | Systems and system models |  |  |
| $\begin{array}{ll} \frac{2}{2} & \frac{n}{0} \\ \frac{0}{n} & \stackrel{0}{0} \\ \sum_{\dot{U}}^{0} & \frac{c}{0} \\ \sum_{\overline{0}}^{0} \end{array}$ | Discipline |  | Core Idea Focus |  |
|  | Earth and Space Science |  | ESS1: Earth's Place in the Universe |  |
|  | Middle School Standards Covered |  | High School Standards Covered |  |
|  | MS.ESS1-1: Develop and use a model of the Earth-sun-moon system to describe the cyclic pattern of lunar phases, eclipses of the sun and moon, and seasons. |  | HS.ESS1- 4: Use mathematical or computational representations to predict the motion of orbiting objects in the solar system. |  |

## national science education standards © 1996

| Content Standards (K-12) |  |  |
| :---: | :--- | :--- |
| $\mathbf{X}$ | Systems, order, and organization |  |
| $\mathbf{x}$ | Evidence, models, and explanation |  |
| $\mathbf{x}$ | Constancy, change, and <br> measurement |  |

| Earth and Space Science Standards <br> Middle School |  | Earth and Space Science Standards <br> High School |  |
| :---: | :---: | :---: | :--- |
| $\times$ | Earth in the Solar System | $\times$ | Origin and Evolution of the Earth System |
|  |  | $\times$ | Origin and Evolution of the Universe |

Indicates standards covered in activity

## benchmarks for science literacy (AAAS, © 1993)

| 1. The Nature of Science | 1B: Scientific Inquiry |
| :--- | :--- |
| 4. The Physical Setting | 4A:The Universe |
|  | 4B:The Earth |
|  | 11A: Systems |
|  | 11C: Constancy and Change |

## activity objectives:

- To model the motion of the Moon.
- To observe the effects of the Moon's motions on Earth-bound observations.
- To discriminate between rotation and revolution.
- To understand the difference between a lunar month and a sidereal month.

## time requirement:

Three 40 minute classes
